

# **High School Course Selection FAQ**

## **A Guide for Classical School 8th Grade Families**

Please review this guide as you prepare to select freshman high school courses. Contact Ms. Krause at [krauserebecca@aad.k12.wi.us](mailto:krauserebecca@aad.k12.wi.us) or Mrs. Schroeder at [schroedersara@aad.k12.wi.us](mailto:schroedersara@aad.k12.wi.us) with any questions you may have after reading through the information below.

### **High School Course Request Worksheet**

Eighth grade students complete a Freshman Course Request Worksheet provided by the high schools to assist them in selecting high school courses. These worksheets are then used by students to guide them in entering course requests in Infinite Campus, generally in mid to late January. Certain course selections require the recommendation of the student's 8th grade subject area teacher. If a student gains enrollment to a charter high school, the counselor for that charter school should get in touch with students to make any necessary schedule modifications prior to the end of their eighth grade year.

### **Credits**

Freshmen must take at least 6 credits and no more than 7 credits. One credit is equivalent to a year-long class; a half-credit is equivalent to a semester class. Credit-load options include...

- 7 credits plus lunch
- 6.5 credits, study hall one semester, plus lunch
- 6 credits, study hall both semesters, plus lunch

Five credits for a student's freshman year are required classes, including...

- 1 credit of Science
- 1 credit of Social Studies
- 1 credit of English Language Arts
- 1 credit of Math
- 0.5 credit of Physical Education
- 0.5 credit of Health

This leaves 2 credits remaining (for a 7 credit schedule) for elective courses. Many Classical School graduates will fill one of those credits with a foreign language class (generally Spanish) while the other credit is often filled with a Fine Arts elective (music, theater, or art). The Appleton Area School District Course and Career Planning Guide contains graduation requirements and descriptions for all courses, including all electives, available to freshmen:

### **[AASD COURSE and CAREER PLANNING](#)**

The back side of the Freshman Course Request Worksheet also generally contains a summary of courses available to Freshmen.

## Summer School

If a student would like to take more than 7 credits their freshman year, online summer school through Appleton eSchool is an option to create some scheduling flexibility. Students may take a semester course online the summer prior to their freshman year. The two most popular online freshman courses are Health and Semester 1 of Civics. Students opting to take one of those required courses online during the summer will create a half-credit opening in their freshman-year schedule. That half-credit opening may then be filled with another half-credit elective or a study hall. The list of summer online courses is typically available in January on Appleton eSchool's website.

<https://appletonschool.org/summer-interim/>

**NOTE: Registration begins in March (check Appleton eSchool's website for exact date). Popular classes often reach capacity on the first day of registration.**

### Science

One credit of science is required for freshmen. That credit is recommended by the high schools to be filled with Biology. See the science sequence in the Course and Career Planning Guide for more information.

### Social Studies

Civics is the required social studies course for freshmen. While there are no other social studies options available to freshmen, summer school through Appleton eSchool may provide some scheduling flexibility. It may be possible for a student to accomplish completion of this credit in a few different ways:

- Semester 1 & 2 Civics in school during freshman year
- Semester 1 Civics online during summer prior to freshman year and Semester 2 Civics in school during freshman year
- Semester 1 Civics online during summer prior to freshman year and Semester 2 Civics online summer prior to sophomore year

If not taking Civics in school both semesters freshman year, please note the desired course scheduling option on the course request worksheet. NOTE: If choosing an option including one or more semesters of Civics online, you will still need to register for the Appleton eSchool class separately when registration opens (see *Summer School* section above).

### English Language Arts (ELA)

Freshmen must choose from two ELA courses. One course is considered more rigorous by the high schools though the course typically only includes one additional writing assignment. The majority of Classical School graduates choose the more rigorous option. A recommendation of which class to select will be provided for each student by their Classical School English teacher.

## **Mathematics**

There are generally five math course options available to freshmen. Students successfully completing Geometry at Classical School will register for either Algebra 2 or Algebra 2 for Pre-Calculus. Students successfully completing Algebra at Classical School will register for Geometry. Students successfully completing Pre-Algebra at Classical School will register for Algebra 1. An optional 1 credit support class is typically available for either Algebra, Geometry, or Algebra 2. On the course request worksheet, the support class may be referred to as WIN, which stands for "What I Need." An additional, though not often pursued, option does exist for those who successfully complete Pre-Algebra at Classical School to spread Algebra 1 over two years by taking Algebra 1A as a freshman and Algebra 1B as a sophomore. A recommendation for which class to select will be provided for each student by their Classical School math teacher.

## **Health and Physical Education**

Freshmen are required to take both a half-credit Health course and half-credit freshman Physical Education course. As noted in the summer school section of this FAQ, taking Health online the summer before freshman year is a popular option to create some flexibility in a student's schedule. If a student wishes to take Health online the summer prior to freshman year, please make a note on the course request worksheet. NOTE: A student choosing to take Health online will still need to register for the Appleton eSchool class separately when registration opens (see *Summer School* section above). Freshman Physical Education cannot be taken online.

## **Foreign Language**

While not required for high school graduation, at least two years of a single foreign language in high school are required for admission to some universities. Students should review the requirements of any post-secondary schools they may be interested in attending. The majority of Classical School students choose to continue their Spanish studies in high school in either Spanish 3 or Spanish 4. A recommendation for which class to select will be provided for each student by their Classical School Spanish teacher. Beginning studies in French is also an option for freshmen. Additional foreign language courses may be available online through Appleton eSchool during the school year.

## **Fine Arts**

One fine arts credit is required for high school graduation. Many students choose to complete this credit their freshman year. There are several fine arts opportunities available to freshmen, including band, orchestra, chorus, theater, and art classes. Humanities may be an option beginning sophomore year if not used as a social studies credit. The Appleton Area School District Course and Career Planning Guide will include all options.

## **Preliminary Freshman Schedules**

Your student will receive a "Course Confirmation Sheet" in March. You are asked to review, sign, and return the sheet to confirm course choices. The high schools will then create a preliminary schedule for each student and try to provide them before the end of the school year. Students should contact their high school counseling office immediately regarding any necessary schedule changes. Final schedules are usually provided at high school registration events at the end of summer.
